About Octavo

Octavo™ publishes rare books, manuscripts, and antiquarian printed material in technologically advanced digital formats. Through partnerships with libraries, institutions, and individual collectors, we make rare editions accessible to students, educators, scholars, and bibliophiles, as well as the everyday book lover.

Octavo Editions let you experience books as they were first presented hundreds of years ago. We photograph every page, including the binding, with traditional large-format cameras with hand-built digital scanning backs. The resulting quality is the highest technologically possible. We are dedicated to making the unique beauty and craftsmanship of these original works easily and affordably available to readers worldwide.

OCTAVO EDITIONS

Octavo Editions are much more than exquisite images of original book pages. Depending on the book or manuscript, Octavo Editions contain live text, complete translations, bibliographic description, and commentary by some of the world's foremost experts.

Octavo digital rare books are delivered on CD-ROM (and soon DVD-ROM) in Adobe® Acrobat® Portable Document Format (PDF) files. These can be viewed on most major computing platforms and can be printed to a vast array of desktop printers. The CD-ROM format allows us to include several files with a range of resolutions; PDF enables features such as viewing, printing, zooming, and navigating.

About Octavo

Octavo Editions can be ordered directly from our secure-commerce enabled web site (www.octavo.com) or you can purchase them through retail, educational, and library marketplaces. Prices range from $25 to $100 (depending on the size and complexity of the original work).

PRESERVATION TECHNOLOGY

Our imaging process has been specially designed for capturing books, using digital cameras to minimize exposure to light and heat. Staff conservators and photographers shepherd the books through the imaging process, then the digital master files are archived, compressed, and manipulated to create the best rendition possible for publication.

We also license our complete digital lab to any institution wanting to use our technology for its own collections.

PARTNER INSTITUTIONS

Octavo obtains rare books and manuscripts through partnerships with libraries, museums, and individuals collectors. Through such partnerships, Octavo addresses one of the most pressing problems of modern libraries and archives: reconciling their responsibility to preserve rare materials with the obligation to make them available to scholars and the general public.

Our goal at Octavo is to broaden access to the rare materials in libraries and museums around the world. With your interest and support, these important institutions will continue to flourish in the digital age.
